

Devon Johnson

Frontend Software Engineer | UX Engineer

WORK EXPERIENCE

ChenMed, Miami, FL

Primary care provider with 100 medical centers nationwide, end-to-end customized technology, and named one of Fortune's 2020 "Change the World" companies.

Associate Software Engineer

07/2017 – 11/2023

- Lead Frontend Developer
- Developed highly responsive, scalable web applications for a technology platform custom designed for value-based care using React, Redux, JavaScript, TypeScript, HTML, and CSS.
- Developed and implemented custom component and widget libraries with Material UI, KendoReact, and Storybook, reducing development time through standardized UI components. Ensured consistent design patterns across 7+ products, enhancing user experience and reducing design inconsistencies by 40%.
- Collaborated with a team of 5 designers to translate design concepts into interactive, pixel-perfect user interfaces, resulting in a 25% increase in user satisfaction scores. Enhanced physicians' user experiences and contributed to significant improvement in patient health outcomes by ensuring seamless access to critical patient data and intuitive navigation.
- Boosted team velocity by 30% and enabled parallel development by creating API proxies that simulated backend endpoints using Node.js and Express.js, resulting in a 25% reduction in development time and enhanced collaboration between frontend and backend teams.
- Resolved critical software bugs errors across development, staging, and production environments, reducing system downtime and improving user satisfaction.
- Integrated third-party software solutions into internal applications.
- Migrated legacy applications from Angular to React, significantly enhancing performance, scalability, and overall user experience through streamlined code consolidation.
- Conducted bi-weekly demonstrations of new features to cross-functional teams and stakeholders, enhancing stakeholder engagement.
- Mentored junior to mid-level developers, fostering professional growth through targeted task assignments, comprehensive code reviews, and consistent feedback and support.
